

Anacortes Refinery

Fact Sheet

REFINERY INFORMATION

Located about 70 miles north of Seattle on the picturesque Puget Sound, the Anacortes Refinery has a total crude oil capacity of 120,000 barrels per day (bpd). The refinery primarily supplies gasoline, jet fuel and diesel fuel to markets in Washington and Oregon, and manufactures heavy fuel oils and liquefied petroleum gas. It receives crude feedstock via pipeline from Canada, by rail from North Dakota and the central U.S. and by tanker from Alaska and foreign sources.

The Anacortes Refinery ships gasoline, jet fuel and diesel fuel through a third-party pipeline system that serves western Washington and Oregon. The facility delivers refined products, including CARB gasoline and components for it, through our marine terminal, via ships and barges. Andeavor operates refined products terminals at Anacortes, Port Angeles and Vancouver, Washington.

FAST FACTS

- Anacortes Refinery full-time employees: Approx. 425
- Crude oil capacity: 120,000 bpd

ENVIRONMENT

- Created an employee-based team (EAGLES) to coordinate refinery and community environmental projects.
- Leading indicators are used to drive continuous improvement in EHS performance.

HEALTH AND SAFETY

- Emphasis on process safety including employee-led programs.
- 2016 AFPM Elite Gold Safety Award Winner.
- 2015 AFPM Elite Silver Safety Award Winner.

COMMUNITY SUPPORT

- Invest in Boys & Girls Club of Skagit to establish the STEM Academy.
